Please reach out. I am currently looking for work!

I don't publically post anywhere besides my blog. Check it out for things I wish to share with the world.

About

I live in the San Francisco Bay Area and I like to code. I graduated from RIT with a bachelor's of science in computer science and Japanese in 2026. For more about me, check out my resume.

Some things that I like:

- **Graphics Programming.** I made a ray tracer following the [Ray Tracing in One Weekend](#) series of books.
- **Programming Languages.** I took Professor Matthew Fluet's [Compiler Construction](#) course and Professor Arthur Azevedo de Amorim's Programming Language Theory course as an undergrad and recommend both highly if you are at RIT.
- **Actual Languages.** I speak Japanese and am currently learning Spanish. If your brain works like mine, I recommend [Anki](#)
